Our products are engineered to meet the highest standards of quality, functionality and design. We hope you thoroughly enjoy your new Braun appliance.

Caution

Please read the use instructions carefully and completely before using the appliance.

- The blades are very sharp!
- Always unplug the appliance when it is left unattended and before assembling, disassembling, cleaning and storing.
- The appliance must be kept out of reach of children.
- Do not hold the motor part **(A)** nor the whisk gear box **(I)** under running water, nor immerse them in water.
- Braun electric appliances meet applicable safety standards. Repairs or the replacement of the mains cord must only be done by authorised service personnel. Faulty, unqualified repair work may cause considerable hazards to the user.
- Before plugging into a socket, check whether your voltage corresponds to the voltage printed on the bottom of the appliance.
- The appliance is constructed to process normal household quantities.
- Neither the beaker **(H)**, nor the chopper bowl/jug **(C)** is microwave-proof.

Description

- (A)** Motor part
- (B)** On/off switch for variable speed
- (C)** On/off switch for turbo speed
- (D)** Buttons for releasing the working parts
- (E)** Variable speed regulator
- (F)** Blender shaft
- (G)** Wall mount
- (H)** Measuring beaker with air-tight lid
- (I)** Whisk gear box
- (J)** Whisk
- (K)** «HC» chopper
- (L)** «BC» chopper
- (M)** Ice crusher insert for «BC» chopper

Setting the speed

When activating switch **(B)**, the processing speed corresponds to the setting of variable speed regulator **(E)**. The higher the setting, the faster the chopping results.

However, maximum processing speed can only be achieved by pressing the turbo switch **(C)**. You may also use the turbo switch for instant powerful pulses without having to manipulate the speed regulator.

Depending on the application, we recommend the following speed settings:

Handblender	1...turbo
Chopper	1...turbo
Whisk	3...9

How to operate your handblender

The handblender is perfectly suited for preparing dips, sauces, soups, mayonnaise and baby food as well as for mixing drinks and milkshakes.

1. Insert the motor part **(A)** into the blender shaft **(F)** until it locks.
2. Introduce the handblender in the vessel, then press the on/off switch **(B)** or the on/off turbo switch **(C)**.
3. To release the blender shaft after use, press buttons **(D)** and pull it off.

You can operate the handblender in the measuring beaker **(H)**, and just as well in any other vessel. When blending directly in the saucepan while cooking, take the pan from the stove first to protect your handblender from overheating.

How to operate your whisk

Use the whisk only for whipping cream, beating egg whites and mixing sponges and ready-mix desserts.

1. Insert the whisk **(J)** into the whisk gear box **(I)**, then insert the motor part **(A)** into the gear box until it locks.
2. Place the whisk in a vessel and only then, press switch **(B)** to operate it.
3. To release, press buttons **(D)** and pull off the gear box. Then pull the whisk out of the gear box.

For best results:

- Do not use the beaker **(H)**, but a wider bowl.
- Start with a low speed setting.
- Move the whisk clockwise, holding it slightly inclined.
- Only whip up to 400 ml chilled cream (min. 30 % fat content, 4–8 °C).
- Only whip up to 4 egg whites.

How to operate your chopper attachment(s)

Both the «HC» and the «BC» choppers are perfectly suited for chopping meat, cheese, onions, herbs, garlic, carrots, walnuts, almonds, prunes etc. When chopping hard goods (e.g. hard cheese) use the turbo switch **(C)**.

N.B.:

Do not chop extremely hard food, such as nutmeg, coffee beans and grains.

Use the «HC» chopper for smaller quantities. It is specially suited for chopping herbs and chilis (with water).

Use the «BC» chopper for larger quantities and for hard foods like parmesan cheese or chocolate. Furthermore, the «BC» chopper is suitable for a variety of other applications like shakes, drinks, purées, light doughs and ice crushing.

Before chopping ...

- pre-cut meat, cheese, onions, garlic, carrots, chilis (see processing guide on page 5)
- remove stalks from herbs, un-shell nuts
- remove bones, tendons and gristle from meat.

For best results, please refer to the speed settings recommended in the processing guide.

Chopping

(see picture section **A** on page 4)

1. Carefully remove the plastic cover from the blade **(b)**. Caution: the blade is very sharp! Always hold it by the upper plastic part.
2. Press the blade onto the centre pin of the chopper bowl **(c)** until it locks. «HC» chopper: press down the blade and turn 90° to lock it. Always place the chopper bowl on the anti-slip base **(d)**.
3. Place the food in the chopper bowl/jug.
4. Put the gear box **(a)** on the chopper bowl/jug.
5. Insert the motor part **(A)** into the gear box until it locks.
6. Press switch **(B)** or **(C)** to operate the chopper. During processing, hold the motor part with one hand and the chopper bowl/jug with the other.
 - «BC» chopper: When chopping hard foods, press down the motor part.
 - «HC» chopper: Do not operate the HC chopper for longer than 2 minutes.
7. After use, press buttons **(D)** to remove the motor part.

8. Then remove the gear box.
9. Carefully take out the blade.
10. Remove the processed food from the chopper bowl/jug. The anti-slip base also serves as an airtight lid for the chopper bowl/jug.

Put all ingredients into the jar, press the turbo switch © and blend for about 30 seconds. Serve at once.

Subject to change without notice.

Additional applications for the «BC» chopper

Shakes, drinks, purées

(for purées, when very fine results are preferred, you may also use the handblender shaft in the «BC» jug).

Light dough (pancake batter)

First pour liquids into the jug, then add flour and finally eggs. Pressing the turbo switch ©, mix the batter until smooth.

Crushed ice

(see picture section **B**)

1. Place the ice crusher insert (f) into the jug. Ensure it fits properly.
2. Place the shaft of the ice blade (e) into the centre hole of the ice crusher insert and press it down.
3. Fill ice cubes into the ice crusher insert.
4. Fit the gear box on the jug.
5. Insert the motor part into the gear box until it locks.
6. Press the turbo switch © until all ice cubes have been crushed. After use, press buttons ® to remove the motor part. Then remove gear box, ice blade and ice crusher insert.
7. Remove the crushed ice or simply fill your drink into the jug for serving at the table.

Alternative: First mix fruits in the jug with the chopper blade (b), filling it up to 0.5 litres maximum. Remove the blade and place the ice crusher insert into the jug in order to crush ice directly into the pureed fruits.

Cleaning

(see picture section **C**)

Clean the motor part ® and the whisk gear box ① with a damp cloth only. The «BC» chopper gear box (a) may be rinsed under the tap, but do not immerse it in water.

All other parts can be cleaned in the dishwasher. However, after processing very salty food, you should rinse the blades right away. Also, be careful not to use an overdose of cleaner or decalcifier in your dishwasher.

When processing foods with colour (e.g. carrots), the plastic parts of the appliance may become discoloured. Wipe these parts with vegetable oil before placing them in the dishwasher.

Recipe example

Mayonnaise (use handblender)

200–250 ml oil

1 egg (yolk and white)

1 tbsp. lemon juice or vinegar

Salt and pepper to taste

Put all ingredients into the beaker according to the a.m. order. Introduce the handblender to the base of the beaker. Pressing the turbo switch ©, keep the handblender in this position until the oil emulsifies. Then, without switching off, slowly move it up and down until the mayonnaise is well combined.

Avocado dip (use «BC» chopper)

Chop 1 clove garlic,

add 2 ripe avocados (quartered, without stone)

1 tbsp. lemon juice

1 tbsp. olive oil

150 ml yoghurt

1/2 tsp. sugar, salt and pepper

Using the turbo switch ©, blend for about 1 minute.

Ice cream (use «BC» chopper)

100 g raspberries (deep-frozen)

10 g powdered sugar

80 g cream

Guarantee

We grant 2 years guarantee on the product commencing on the date of purchase. Within the guarantee period we will eliminate, free of charge, any defects in the appliance resulting from faults in materials or workmanship, either by repairing or replacing the complete appliance as we may choose.

This guarantee extends to every country where this appliance is supplied by Braun or its appointed distributor.

This guarantee does not cover: damage due to improper use, normal wear or use as well as defects that have a negligible effect on the value or operation of the appliance.

The guarantee becomes void if repairs are undertaken by unauthorised persons and if original Braun parts are not used.

To obtain service within the guarantee period, hand in or send the complete appliance with your sales receipt to an authorised Braun Customer Service Centre.

For UK only:

This guarantee in no way affects your rights under statutory law.
